Dear Ms. Taricano:

At a meeting of the New Bedford Water Board held on June 29, 1993, the matter of the P.C.B. burning site at the end of Sawyer Street was discussed.

The suggestion of the cleaning and cement lining of the water main was dismissed as not practical, due to the poor condition of the main. The Water Board voted instead to require that a 12" water main be installed in its place.

Yours truly,

Clerk of the Water Board
